Subject: R5 BUILDING UPDATE: Limited Access to R5 Facilities - Next Week (Sent to R5 All)

Limited Access to R5 Office Buildings Over the Next Week

Beginning this week and running through at least Inauguration Day on January 20, there may be an increase in protest activity at government facilities. As such, the DHS-Federal Protective Service (FPS) has been actively engaged in this matter and has informed EPA that for next Tuesday and Wednesday, January 19-20, the Metcalfe Federal Building (MFB) building will go into "weekend access mode." This will reduce the number of entrances and anyone who visits the Metcalfe Building must enter through the pedestrian doorway along Clark Street between 6 a.m. and 6 p.m. To summon a guard upon arrival, press the call button at the entrance or dial the posted number from a mobile device. Once inside, all individuals must pass through the screening checkpoint and sign in/out at the guard's station on the loading dock. Depending on circumstances, weekend access mode may be extended through the remainder of the week.

While there are currently few employees entering EPA Region 5 facilities due to COVID-19, in order to support our FPS colleagues, I am encouraging all staff to work at their alternative work locations next week. Further, all visits to the office/R5 facilities that are planned for next week must be expressly cleared by your division director, deputy division director, or their designee.
